 Precision Aircraft Solutions (<http://www.payloadasia.com/tag/precision-aircraft-solutions/>)

Precision Aircraft Solutions has completed its 28<sup>th</sup> passenger-to-freighter conversion for the DHL global network. The conversion is also Precision's 12<sup>th</sup> redelivery in less than a year to the DHL affiliate European Air Transport Leipzig.

Stated Precision President Gary Warner, "We are pleased to provide DHL with another Precision freighter for its European fleet."

Conversion of the 757-200 aircraft, MSN 26275, was performed at HAECO Americas in Greensboro, NC.

Precision Aircraft Solutions offers world-leading conversions, cutting-edge aircraft modification options, and a full complement of OEM-equivalent integrated aircraft services. Airlines, OEMs, MROs, and leasing companies around the globe choose Precision for quality response, quick turnaround, low costs, less stress, and scalable solutions.

The Precision Aircraft Solutions freighter and combi lead the 757-200 conversion industry with the lowest operating empty weight in production, the only winglet-compatible design in the world, and proprietary weight upgrades resulting in the highest payload available. With Boeing licensure and global market acceptance – including Rolls-Royce and Pratt & Whitney engine variants – its unparalleled conversions are available today, across the map.

The Precision 757-200PCF has the lowest operating empty weight and the highest payload of any 757 conversion in production today. At just 115,500–116,000 lb., it is 1,500–1,800 lb. lighter than the competition. The Precision freighter also offers significant weight upgrades and the world's only winglet-compatible design. With so many unbeatable assets, the best freighter for any fleet is the Precision 757-200PCF.
