

**Position: Quality Inspector (Aviation)**

Precision Aircraft Solutions, LLC is internationally known for creating the premier Passenger to Cargo aircraft conversion. We are seeking a highly qualified Quality Inspector to work in our Beaverton, Oregon location.

**Duties and Responsibilities:**

- Ensure that inspections are performed to approved design data on all incoming and outgoing materials, articles, and assemblies
- Use calibrated precision inspection equipment such as calipers, micrometers, height gages, radius gages, etc. to measure and evaluate characteristics of parts, material, and assemblies.
- Read and understand engineering drawings, blueprints, specifications, standards, and other instructions.
- Perform in-process, first article, and final inspections in accordance with AS9102 standards and/or customer requirements.
- Identify and document nonconformities accurately and legibly for MRB review
- Assist with internal quality audits in preparation for FAA and vendor audits
- Help track, manage, and maintain list of calibrated shop inspection tools and equipment.
- Assist with training and providing guidance to other team members
- Other tasks reasonably requested due to the nature of the position

**Minimum Qualifications:**

- High school or equivalent; technical or vocational education a plus.
- 5+ years of recent experience in quality in a manufacturing environment (aircraft preferred).
- Experience reading and interpreting engineering drawings and specifications
- Basic understanding of Geometric Dimension and Tolerancing (GD&T) methods
- Proficient in the use of inspection tools and procedures to accept/reject critical part dimensions
- Working knowledge of Microsoft Office and SharePoint software applications
