WHERE CHANGE TAKES FLIGHT

## **MRO Quality Assurance Auditor**

Precision Aircraft Solutions, LLC is internationally known for creating the premier passenger to cargo aircraft conversion. We are seeking an MRO Quality Assurance Auditor to work at our partner MROs in the United States and in China. This full-time position reports to the Quality Manager and is based in Sanford, FL.

### **Duties and Responsibilities:**

- Provide quality oversight of company processes, policies, and procedures through the use of onsite monitoring and audits of MRO maintenance, repair and alteration activity.
- Conduct assessments through analysis and interpretation of objective evidence to ensure compliance with established company quality standards and contractual requirements.
- Monitor MRO compliance with regulatory requirements, company engineering drawings, task cards, process specifications and quality standards.
- Inspect aircraft installations for fastener installation, cable harness assembly installation, equipment installation, fastener installation, sealing, etc. for acceptable workmanship, proper functioning, and completeness.
- Ensure non-conformities are properly dispositioned in accordance with company procedures and standards.
- Define and maintain an effective and efficient quality MRO audit program.
- Independently and objectively plan and execute MRO quality system, process, and performance audits in accordance with professional auditing standards.
- Prepare audit reports which include formal recommendations to the MRO for review and implementation.
- Enter findings into a computerized quality reporting database, review corrective actions, and assist with implementation of recommendations.
- Champion problem solving and root cause analysis activities with partner MROs to eliminate recurrence of non-conformances.
- Follow up with MROs to ensure corrective actions are implemented in a timely manner.
- Verify implementation and effectiveness of corrective actions through continuous observation and follow up audits.
- Collect, analyze, and report MRO performance quality metrics across all MROs to identify process-level failures and breakdowns.
- Serve as company point-of-contact for MRO quality related issues.
- Maintain a working knowledge of regulatory requirements and industry quality assurance codes and standards.
- Monitor and report to the Quality Assurance Manager quality-related metrics, including but not limited to, MRO quality escapes to meet established organizational goals.
- Other tasks reasonably requested due to the nature of the position.
